

Bonus Blend

Winter Rye/Barley/Radish/Rapeseed

- Excellent fall weed suppression
- More biological diversity to stimulate microbes
- Long establishment window for a fall blend
- Improve soil structure and increase OM

Benefits

Limited

Excellent

Increase Organic Matter

Scavenge Nutrients

Reduce Compaction

Improve Soil Tilth

Improve Soil Structure

Fall Weed Suppression

Spring Weed Suppression

Species Diversity

Description

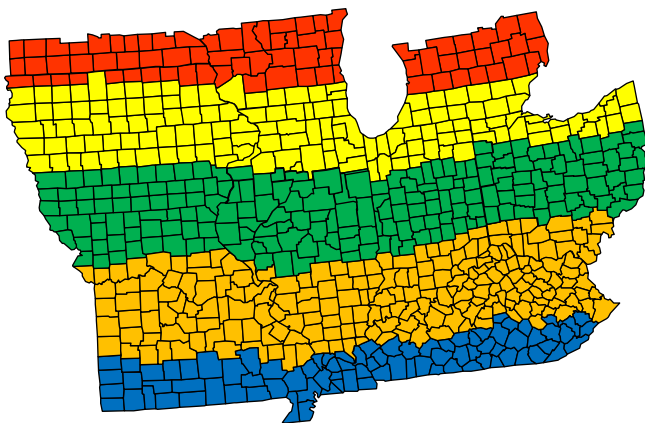

This 4-way mix has a large planting window and low seeding rate compared to winter rye. The planting window is August 15th to September 30th. The mix contains reSTORE Winter Rye, Barley, Rapeseed and reCLAIM radish. The 4-way blend gives excellent fall weed suppression. It also provides multiple ways to scavenge nutrients. The lower seeding rate and chance that the Barley may not over winter will make it easier to terminate in the spring.

Management

Overall Management Level	Medium
Over Wintering Ability	Excellent
Seeding into Corn	Highly Recommended
Seeding into Soybeans	Highly Recommended
Seeding before Corn	Need Experience
Seeding before Soybeans	Highly Recommended
Fall Forage	Very Good
Spring Forage	Very Good
Seeding Depth	1/2" deep

Last planting date

1	2	3	4	5
Sept 15	Sept 30	Sept 30	Oct 10	Oct 10

Termination

reCLAIM radish winter kills around 15 degrees while rapeseed requires about 5 degrees. The over wintering of Barley and Rapeseed will be variable from year to year. Use full rates of glyphosate for termination. If the radish or rapeseed overwinters you will need to add one pint of 2,4-D.

Recommended Seeding Rates

Seeding Method	Pounds per Acre	
	General	Forage
Drilling	35 lbs.	50 lbs.
Broadcast	45 lbs.	60 lbs.
Aerial	45 lbs.	60 lbs.
Precision Planting	30 lbs.	40 lbs.
